公司介紹

- 元盛由David Harding於1997年創立。元盛以研究為核心，專注並擅長將統計分析和數理實證運用於金融市場；投資管理團隊大多為科研實證背景。
- 專注系統化投資。團隊25年歷史深耕量化領域，專注于獲取阿爾法、風險管理、以及組合構建；具備多種策略風格和多樣資產類別的投資管理能力。
- 以研究和經驗為基石。投資管理和研究職能的員工占絕大多數；團隊在系統化投資領域經驗豐富。
- 關注機構化和行業發展。公司資產管理規模中包括許多較大的機構投資者；卓越的基礎設施和內部文化。

投資策略總結*

- 趨勢跟蹤是一種系統化的量化投資策略。趨勢策略的投資理念，有別於傳統的經濟分析或宏觀基本面的分析預測。
- 趨勢策略在市場有趨勢時獲利，與價格方向（上漲或下跌）無關；策略可以在各種不同的宏觀週期下運作。
- 趨勢策略在歐美已有50 多年的實盤歷史，現已成為機構策略中的重要組成部分。
- 元盛趨勢策略旨在從價格趨勢形成中利用系統化的方式獲利。元盛已交易系統化趨勢跟蹤策略超過 25 年，經歷期間的各種市場環境。我們認為區別不同趨勢策略的主要因素包括： 1 ）交易速度；2 ）投資範圍與分配權重；3 ）風險管理。
- 趨勢策略與主要的大類資產（如股票債券等）長期的相關性較低，提供分散多元的收益來源，是組合中配置的重要補充。
- 元盛對投資的風險管理的首要目標是避免投資者資本的永久損失；投資策略的設計和投資系統的運作也以此為依據。

Term Sheet — Winton Trend Fund

This investment guide is non-public promotional material and may not be redistributed, reproduced or circulated to third parties and is intended solely for the information of accredited investors of Noah Singapore. The specific terms and conditions of the products and the rights and obligations of the parties shall be governed by the legal documents of the products, and investors should make investment decisions based on their own circumstances.

Introduction of Fund Manager

- Winton was founded in 1997 by David Harding. Winton takes research as the core, focuses on and is good at applying statistical analysis and mathematical demonstration to the financial market; most of the investment management team has a background in scientific research and demonstration.
- Focus on systematic investment. The team has a 25-year history of deep cultivation in the field of quantification, focusing on obtaining alpha, risk management, and portfolio construction; with investment management capabilities of various strategic styles and asset classes.
- Built on research and experience. The investment management and research functions are predominately staffed; the team is experienced in systematic investing.
- Focus on institutionalization and industry development. Company AUM includes many larger institutional investors; excellent infrastructure and internal culture.

Investment Strategy*

- Trend following is a systematic quantitative investment strategy. The investment philosophy of the trend strategy is different from the traditional economic analysis or the analysis and prediction of macro fundamentals.
- Trend strategies profit when the market is trending, regardless of price direction (up or down); strategies can operate in a variety of different macro cycles.
- Trend strategy has a history of more than 50 years in Europe and the United States, and has now become an important part of institutional strategy.
- The Winton Trend Fund aims to profit in a systematic way from the formation of price trends. Prime has been trading systematic trend-following strategies for over 25 years through a variety of market environments. We believe that the main factors that distinguish different trend strategies include: 1) transaction speed; 2) investment scope and allocation weight; 3) risk management.
- The trend strategy has a low long-term correlation with major asset classes (such as stocks and bonds, etc.), providing diversified and diversified income sources, and is an important supplement to the allocation in the portfolio.
- The primary goal of Winton's investment risk management is to avoid permanent loss of investors' capital; the design of investment strategies and the operation of the investment system are also based on this.

*Please notice Noah Singapore distribution shares are Winton Trend Fund (UCITS) USD I-D shares. The shares were established on March 1, 2023, and the Winton Trend Fund (UCITS) USD I shares and I-D shares are the same underlying fund, with only a difference in fees, for reference only. The performance display of the strategy represents the performance of the representative product with the largest share in the same strategy, for reference only. There are three representative products with the largest share in Winton's main market trend strategy, corresponding to the periods from October 1997 to June 2012, and from July 2012 to June 2018. Non-trend signals are included in the performance records from October 2004 to June 2018, accounting for about one-fourth of the total performance during this period. The performance records from June 2010 to July 2012 include a small portion allocated to a single stock that is currently not part of the main market-market trend strategy. During this period, the total contribution to performance is +51 basis points of the total expenses. During this period, the allocation of the representative investment product to trend tracking signals is between 60-75%. Since 2018, the representative investment product has been fully invested in trend-following signals. Before 2009, the operational risk of the strategy was approximately twice the current level. The target risk level of the strategy may change.
