投資指南—歌斐全球多策略母基金

NOAH 諾亞控股(香港)
Noah Holdings (Hong Kong) Limited

本投資指南爲非公開宣傳材料，僅向香港專業投資者定向發送，不得進行轉發、轉載或向第三方傳閱，僅供香港專業投資者參考；
不構成管理人和諾亞香港的投資建議或任何承諾，產品的具體條款及各方權利義務以產品法律文件爲准, 投資人需根據自身情況自行決策。

產品概況

- **頭部知名基金組合：**在全球宏觀不確定性增強的大背景下，通過歌斐紅樹林資產管理有限公司（下稱“歌斐/歌斐紅樹林”）專業的基金研究篩選能力和配置能力，在全球尋找不同投資策略、不同投資風格的全球頭部知名基金加入基金池，通過優化配置和動態調整來降低組合波動，提升風險調整後收益。為客戶提供一個有相對穩定收益的美元產品。
- **調倉規則：**根據市場需要進行適度調整以達到優化配置，並有嚴格的風控限制。
- **當前配置方案：**調整後的当前配置為五個基金，分別是：AQR, BHA, Coatue, GMO, Graham（基金全稱見下表），当前配置比例則為30%，20%，20%，10%，20%。管理人有權根據市場以及實際情況而適時地對基金底層投資策略和配置比例作出相應調整。

風險提示及免責聲明

風險提示：

潛在投資者應意識到對基金的投資涉及非常高的風險，包括損失全部投資金額的風險。無法保證基金的投資政策會成功或投資目標能夠實現。

在評估投資基金的優點和適用性時，潛在投資者應仔細考慮以下風險因素以及本發行備忘錄中其他地方討論的任何其他風險。但是，此列表不是，也不會是一個詳盡的列表或全面的描述。以下沒有涉及的其他風險在基金管理和運行中也有可能會出現。

- **投資和交易風險：**不能保證基金將實現其投資目標。意向投資者在認購前，應閱讀整份招募說明書，並諮詢其顧問。基金份額只能作為整體投資計畫的補充而購買，而且只能由能夠承擔相關風險的投資者購買。投資顧問對投資前景的評估可能不準確。我們無法保證投資顧問代表本基金實施的任何投資或交易策略將會成功，且由於本基金投資及交易策略的投機性質，投資者可能會蒙受其投資資本的重大損失，包括全部投資的損失。基金份額的價值可能上升或下降，因為本基金投資的證券的資本價值可能波動。本基金的投資收益是根據其持有的證券的收益減去所發生的費用。因此，基金的投資收入可能會隨著這種費用或收入的變化而波動。

- **杠杆風險：**由於其衍生品頭寸，本基金的總投資敞口可能超過其淨資產(即本基金可能使用杠杆)，在此情況下，本基金可能面臨更高的損失風險。本基金的業績在很大程度上(如果不是主要的話)取決於其衍生品底層資產或指數的表現，儘管本基金並不擁有這些資產或指數背後的資產。本基金亦可投資於衍生品及ETF，以獲取或調整其多頭或空頭投資敞口的部分，並作為證券借貸的替代品。ETF可能嵌入衍生品和/或杠杆。“杠杆”是計算所使用的衍生品名義金額的總和。本基金的杠杆率可能高達基金資產淨值的4倍(400%)。本基金所披露的杠杆水準不會成為基金的額外風險暴露限額。

- **股票市場風險：**當基金投資於股票時，它面臨股票的市場價格下降的風險。該下降可歸因於影響發行人的因素，例如未能跟上技術進步或對其商品或服務的需求減少，或影響特定行業的因素，例如需求下降、勞動力或原材料短缺或生產成本增加。下跌亦可能歸因於與公司或行業無關的一般市況，例如實際或感知的不利經濟狀況、企業盈利的一般前景變動、利率或貨幣利率變動或普遍的不利投資者情緒。股票通常具有顯著的價格波動，其市場價格可能以快速或不可預測的方式下降。

- **操作風險：**投資顧問及其他服務提供者提供的其他服務，包括定價、行政、會計、稅務、法律、託管、過戶代理及其他運營服務等，帶來的操作風險。此類操作風險的例子包括服務提供者不適當的程式和控制、人為錯誤和系統故障導致損失的可能性。

- **衍生品風險：**本基金可能投資於衍生品，衍生品是指價值取決於或衍生自相關資產(如證券、商品或貨幣)價值、參考利率(如利率、貨幣匯率或通貨膨脹率)或指數的金融合同。使用衍生工具涉及其價值相對於其設計追蹤的資產、利率或指數的價值變動可能不會如預期變化的風險。衍生工具包括但不限於期貨合約、遠期合約、貨幣合約、掉期合約、差價合約、證券及指數期權、期貨合約期權、掉期合約期權、利率上限、下限及領圈、逆回購協議及其他場外(OTC)合約。以下概述投資者在投資本基金前應瞭解的有關運用衍生工具的若干風險因素及問題。同時請參見“基金投資的說明與風險”一節所述與特定衍生工具及其他投資技術相關的若干風險的說明。

- **非流動性資產風險**：本基金或投資組合基金擁有或購買的證券或其他資產的活躍交易可能於本基金或投資組合基金作出投資後停止。於此情況以及於出現極端市場活動和錯位（包括波動、價差擴大和流動性不足）的情況下，本基金或投資組合基金可能無法於需要時及時清算其投資。

- **指定投資風險：**董事可與投資管理人協商及於某些特殊情況下，將本基金的特定投資或若干投資指定為指定投資。本基金預期任何時候均不會有大部分資產成為指定投資，不過這可能於特殊情況下發生變化。

免責聲明：

Product Overview

- **Headline Fund Portfolio:** Under the background of increasing global macro uncertainty, the Investment Manager intends to primarily invest in brand hedge funds with different investment strategies and assets classes globally, and will diversify risk by investing in funds which satisfy a comprehensive risk management and selection process. The Investment Manager will actively monitor the Portfolio Funds and rebalance the portfolio with the aim to enhance return and control risk.
- **Trading Rules**: Adjustments will be made to achieve optimal allocation. Internally strict risk control limits are in place.
- **Current Allocation Plan**: The adjusted allocation consists of five funds: AQR, BHA, Coatue, GMO, and Graham (full fund names provided in the table below). The current target allocation percentages are 30%, 20%, 20%, 10%, and 20% respectively. The fund manager reserves the right to make appropriate adjustments to the underlying investment strategies and allocation ratios based on market conditions and actual circumstances.

Investment Team

Jeff Li | CEO

Mr. Li has more than 25 years of executive management experience in financial industry in both China and America. Mr. Li began his career in 1997 as a quantitative strategist at Long-Term Capital Management (LTCM), a large quantitative hedge fund in the United States, developing arbitrage strategy models. From 1998 to 2004, he was Vice President of Equity Quantitative Strategy and Algorithmic Trading department at Goldman Sachs in New York. Jeff has served as Chief Product Officer and Executive Committee of Lufax Holding Group (NYSE:LU), a subsidiary of Ping An Group; Co-founder and President of Sycamore Investment; Global Managing Director and China Chairman of CITCO, the world's largest company in fund administration sector; Co-founder of OpHedqe, the world's seventh largest hedge fund operating services firm.

Mr. Li holds a Bachelor's degree in Physics, a Master's degree in Electrical Engineering from Sun Yat-sen University, a Master's degree in Computer Science from the University of San Francisco, Executive Management and EMBA from MIT/CEIBS.

Frank Wang | Deputy CEO and investment manager

Mr. Wang is currently deputy CEO of Gopher Redwoods Asset Management Limited, responsible for global capital markets investments. Mr. Wang has decades of experience in investment management, asset allocation, risk management, management consulting and fintech for global leading companies. He is experienced in a variety of asset classes including equities, fixed income, structured products, commodities, interest rates and hedge fund investments. In China, Frank has served as deputy CEO of Shanxi Securities Asset Management Co., LTD., Managing director of CreditEase Wealth Management and deputy CEO of its asset management company, Director of Nuode Asset Management Co., LTD., etc, and responsible for tens of billions of assets invested in global capital markets. Frank was Senior Vice President of Citigroup Alternative Investments with $30 billion AUM in New York, where he was responsible for multi-strategy hedge fund investments. He was director of the $8 billion AUM multi-strategy hedge fund NPGC. He had also previously worked for top ranked institutions such as UBS and American Express.

Mr. Wang holds a Bachelor's degree from Tsinghua University, a Master's degree in Engineering from University of California, and an MBA from Haas School of Business at University of California, Berkeley. Mr. Wang is CFA charter holder.

Risk Warning and Disclaimer

Risk Warning:

Potential investors should be aware that investing in the Fund involves a very high level of risk, including the risk of losing the entire amount invested. There can be no assurance that the Fund's investment policy will be successful or that its investment objectives will be achieved.

When evaluating the merits and suitability of an investment fund, potential investors should carefully consider the following risk factors and any other risks discussed elsewhere in PPM. However, this list is not, and will not be, an exhaustive list or comprehensive description. Other risks not covered below may also arise in the management and operation of the Fund.

- Investment and trading risks: There can be no assurance that the Fund will achieve its investment objectives. Prospective investors should read the entire prospectus and consult their advisers before subscribes. Fund shares can only be purchased as a supplement to the overall investment plan and only by investors who can afford the associated risks. An investment adviser's assessment of investment prospects may be inaccurate. There can be no assurance that any investment or trading strategy implemented by an investment adviser on behalf of the Fund will be successful, and due to the speculative nature of the Fund's investments and trading strategies, investors may suffer a significant loss of their invested capital, including the loss of their entire investment. The value of the Fund shares may increase or decrease because the capital value of the securities in which the Fund invests may fluctuate. The Fund's investment income is based on the income of the securities it holds less the expenses incurred. As a result, the fund's investment income may fluctuate in response to changes in such fees or income.
- Leverage risk: Due to its derivative positions, the Fund's total investment exposure may exceed its net assets (i.e., the Fund may use leverage), in which case the Fund may be exposed to a higher risk of loss. The Fund's performance is largely, if not primarily, dependent on the performance of the underlying assets or indices of its derivatives, although the Fund does not own the assets behind those assets or indices. The Fund may also invest in derivatives and ETFs to acquire or adjust a portion of its long or short investment exposure and as an alternative to securities lending. ETFs may be embedded in derivatives and/or leverage. "Leverage" is the sum of the nominal amounts of the derivatives used in the calculation. The leverage ratio of the Fund may be as high as 4 times the net asset value of the Fund (400%). The level of leverage disclosed by the Fund does not constitute an additional risk exposure limit for the Fund.
- Stock market risk: When a fund invests in stocks, it is exposed to the risk that the market price of the stocks will decline. This decrease can be attributed to factors affecting issuers, such as failure to keep up with technological advances or reduced demand for their goods or services, or factors affecting specific industries, such as declining demand, shortages of labor or raw materials, or increased production costs. Declines may also be attributable to general market conditions unrelated to the company or industry, such as actual or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or generally adverse investor sentiment. Stocks typically have significant price fluctuations, and their market prices can decline in rapid or unpredictable ways.
- Operational risk: Operational risk arising from other services provided by investment advisors and other service providers, including pricing, administrative, accounting, tax, legal, custody, transfer agents and other operational services. Examples of such operational risks include the possibility of loss due to inappropriate procedures and controls by service providers, human error, and system failures.
- Derivatives risk: The Fund may invest in derivatives, which are financial contracts whose value depends on or is derived from the value of autocorrelated assets (such as securities, commodities or currencies), reference interest rates (such as interest rates, currency exchange rates or inflation rates) or indices. The use of derivatives involves the risk that their value may not change as expected in relation to the value of the asset, interest rate or index that they are designed to track. Derivatives include, but are not limited to, futures contracts, forward contracts, currency contracts, swaps, contracts for difference, securities and index options, futures contract options, swap contract options, interest cap, floor and collar, reverse repurchase agreements and other over-the-counter (OTC) contracts. The following Outlines certain risk factors and issues that investors should be aware of in relation to the use of derivatives before investing in the Fund. Please also refer to the section entitled "Descriptions and Risks of Fund Investments" for descriptions of certain risks associated with specific derivatives and other investment techniques.
- Illiquid Asset risk: Active trading in securities or other assets owned or purchased by the Fund or Portfolio Fund may cease after an investment is made by the Fund or Portfolio Fund. In this case and in the event of extreme market activity and dislocation (including volatility, widening spreads and illiquidity), the Fund or Portfolio Fund may not be able to liquidate its investments in a timely manner when required.
- Designated Investment risk: The Directors may, in consultation with the Investment Manager and in certain exceptional circumstances, designate specific investments or investments of the Fund as designated investments. The Fund does not expect a majority of its assets to be designated investments at any time, although this may change in exceptional circumstances.
